Rubber Acoustic Ceiling Hangers

Type LHRH

Designed specifically for applications where audible noise attenuation is of most concern, the LHRH offers a low cost alternative to larger more traditional spring and rubber hangers.

Primarily used to effectively decouple mass acoustic ceilings from the supporting building structure – thus preventing noise breakout or break-in.

Design Features

- Low Height Rubber Hangers have natural rubber elements with deflections up to 6 mm.
- Epoxy powder coated steel frame tested to 5 x rated load. Other steel parts are zinc plated.
- Low Height Rubber Hangers supplied with failsafe steel overload washer.
- Capable of up to 15° angular misalignment.

Typical Applications

- Acoustic Ceilings.

Excellence in Anti Vibration Technology Since 1914
